MySQL MCP Server + Claude Desktop

```
{
  "mcpServers": {
    "mysql": {
      "type": "stdio",
      "command": "uvx",
      "args": [
        "--from",
        "mysql-mcp-server",
        "mysql_mcp_server"
      ],
    "env": {
      "MYSQL_HOST": "localhost",
      "MYSQL_PORT": "3306",
      "MYSQL_USER": "student",
      "MYSQL_PASSWORD": "student",
      "MYSQL_DATABASE": "4iz562"
    }
  }
}
```

You need the uv Python package to run the mysql-mcp-server inside an on-demand virtual environment. On Windows use pip to install it, on Mac use Brew instead!!

Can you use MySQL MCP Server to give me a list of tables from 4iz562 database?

Orchestrated database query to retrieve table listings >

Sure! Let me query the MySQL MCP Server for the tables in the `4iz562` database right away.

Retrieved database table information successfully >

Here are the **23 tables** found in the `4iz562` database, grouped by their prefixes:

LOV (List of Values) Tables — likely lookup/reference data:

- `LOV_ADDR_TYPE`
- `LOV_CONT_TYPE`
- `LOV_COUNTRY`
- `LOV_ESA95`
